

Import Digital Content

You will need to import your downloaded digital content packages into myStory Designer to use them. You can do this in just a few simple steps.

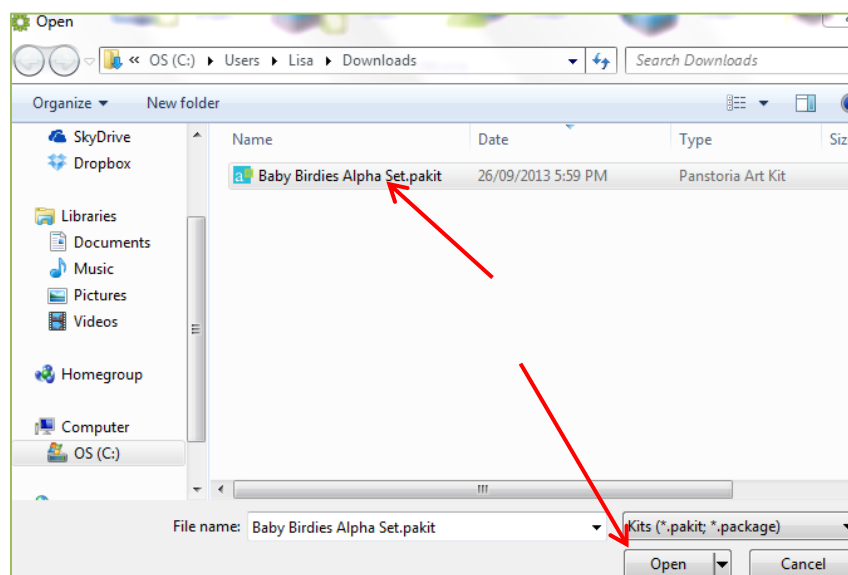

1. Open myStory Designer and click **Import content**

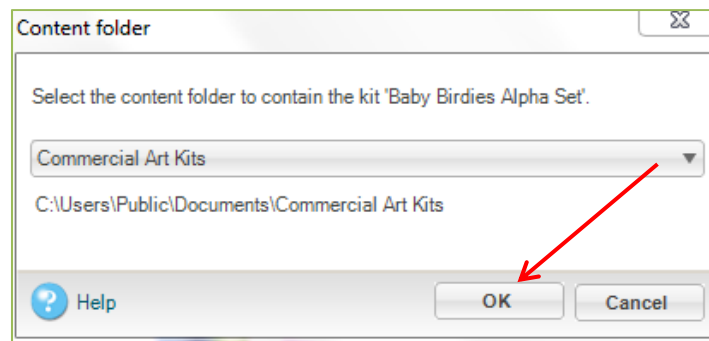

2. Select the type of art kit you wish to import. (Content packages downloaded from myStory are 'Commercial Art Kits').

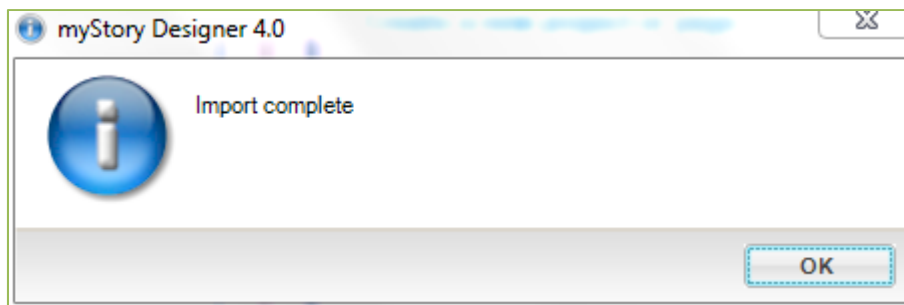

3. Browse to the location of the content packages (most likely your Downloads folder, unless you changed the default location for download files). Click **Open**

4. Select the content folder for the kit. Click **OK**.

5. The content package will be imported. You'll see a confirmation message when it's done!

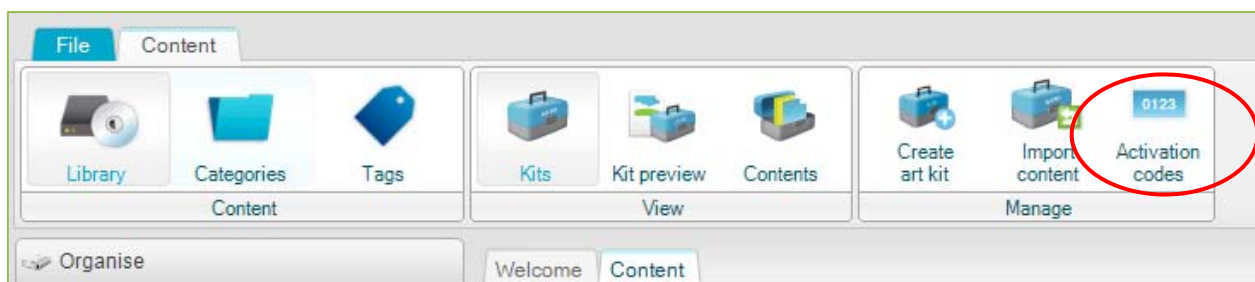

Entering Activation Codes

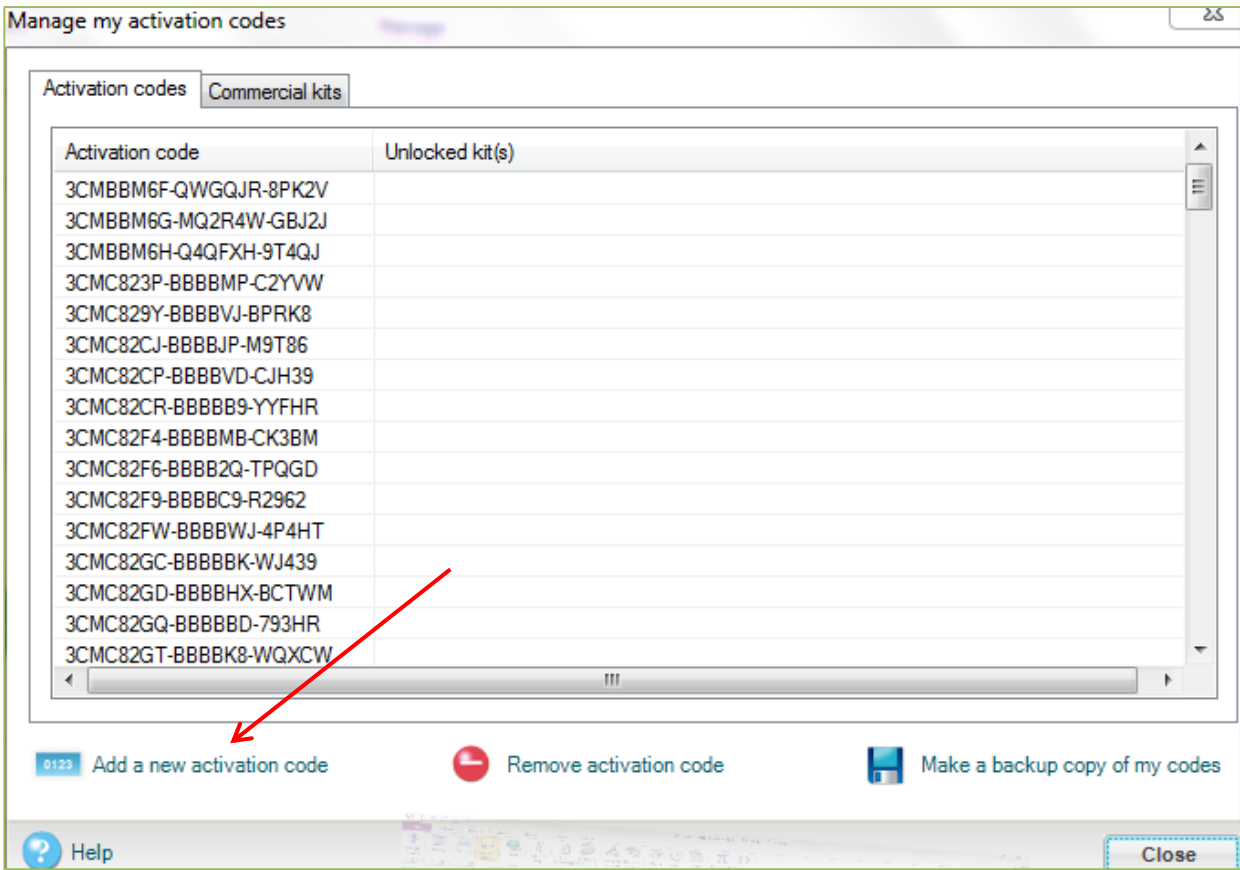

myStory digital content packages that you have purchased will require activation. (Free download packages do not). The activation code for each kit you purchased is listed on the myStory website under myStory Corner > My Downloaded Content.

To activate your digital content:

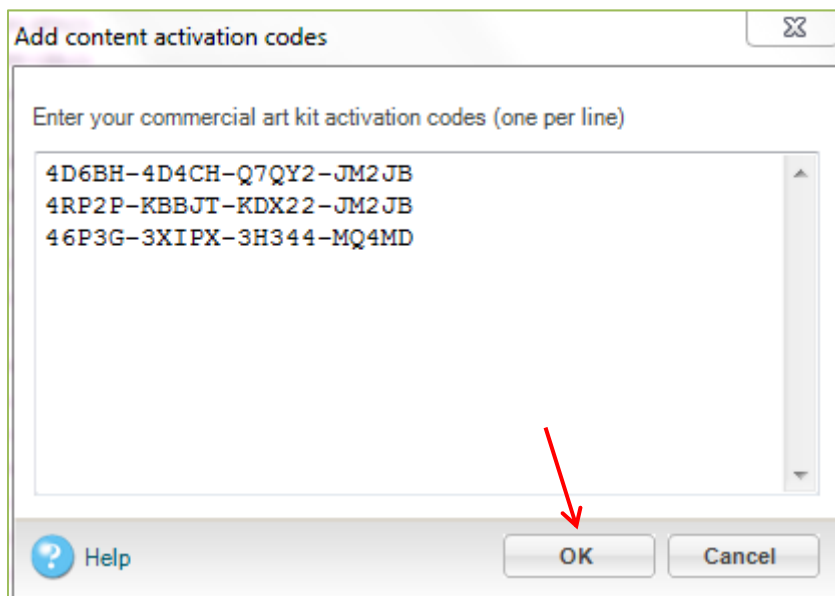

1. From the Content ribbon, click **Activation codes**

2. Click **Add new activation code**

3. Enter the activation code. You can enter multiple codes just make sure you put each one on a separate line. Click **OK**.

4. That's it! Your digital content is ready for use. Get to it!
